

CUMIFLEXTUFF

CUMIFLEXTUFF is a wear-resistant, ceramic-lined flexible rubber hose, ideal for conveying systems subject to vibration, impact, and extreme wear, while still requiring flexibility. CUMIFLEXTUFF can be easily connected to existing pipe systems using flanges as end connections, offering excellent flexibility.

CUMI Advantage

Material properties: we leverage cutting-edge R&D and innovation in material science to deliver superior solutions.

One-stop-shop: we offer comprehensive project management, from design to onsite maintenance, ensuring seamless integration and optimal performance.

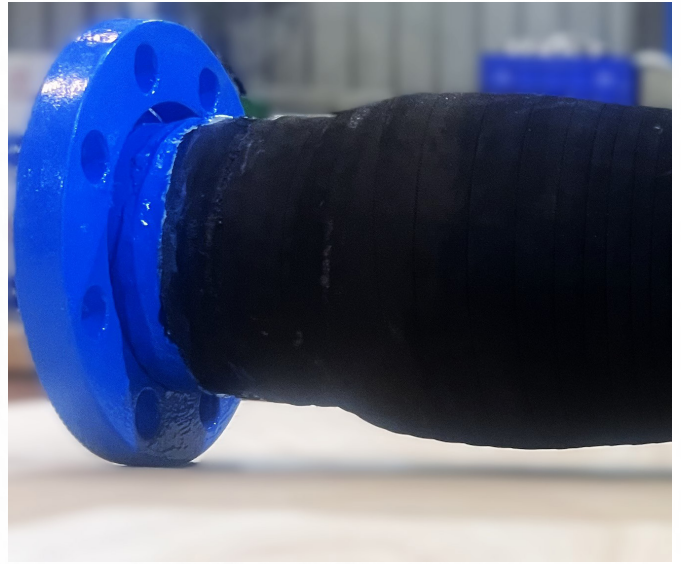

Precision Engineering: Our in-house engineering team ensures fast and seamless production and replacement of components

Proven performance: We have over 25 years of experience operating in Australasia, backed by CUMI India, one of the largest engineered ceramic manufacturers.

A GLOBAL LEADER IN ENGINEERED CERAMICS

CUMI's advanced technical ceramics are formulated to provide maximum protection against abrasive wear and will outlast traditional liners such as basalt, rubber, nihard, and ceramic compounds many times over. These ceramics are engineered to deliver superior performance in demanding environments. CUMIFLEXTUFF is available to fit your application and can be custom manufactured to your exact specifications, ensuring a perfect fit for your needs.
